

Virtual Library

Latin America / Spain / Portugal

A common project of the Ibero-American
Institute Berlin, the Institute of
Iberoamerican Studies Hamburg, the State
and University Library Bremen and the State
and University Library Hamburg

Financed by

Partner of

A virtual library ...

- ... is an internet portal, that enables users to carry out an integrated, subject-specific online-search.
- ... allows access on selected, subject-specific materials from historical books to complete digital documents.
- ... collects, manages and keeps up worldwide distributed high quality websites.
- ... integrates resources for scientific research as well as services and tools for scientific communication like discussion forums, newsletters and mailing lists.

The Virtual Specialist Library *cibera*

Since May 2003 the IAI Berlin, the IIK Hamburg and the SuUB Bremen are working together in the development of the common Virtual Library *cibera*.

In November 2004 the portal went online during the annual congress of the ADLAF (= German LASA).

Supplemently funding by the DFG (German Research Society) for the State and University Library Hamburg for the regional covering of Spain and Portugal of *cibera* was approved.

The first phase of *cibera* ends in April 2005, a second two-year funding by the DFG has been applied for (and is almost approved).
